For example, you may need to increase tension when driving
into hardwood.

Warranty

Logan Graphic Products, Inc. ("Logan") warrants the Dual-Drive Point Driver - Model F500-1, to be free from defects in parts and workmanship for a period of one year from the date of original purchase. Logan warrants that it will either repair or replace, at its sole discretion, any necessary replacement parts found to be defective. Should the product need to be returned to Logan for repair or replacement parts, authorization for any return must come from Logan in writing. Costs of returning the product to Logan, including insurances, shall be borne by the purchaser. Logan shall not be liable for any damages or losses, incidental or consequential, direct or indirect, arising from the use of this product. This warranty extends only to the original purchaser and is not assignable or transferable. This warranty is in lieu of all other warranties, expressed or implied.

The Logan Dual Drive Point Driver can be used to insert both Flexible and Rigid Points making this a very adaptable point driver.

For best results push the 'Nose' up to the inside of the picture frame and squeeze the 'Trigger'. You may want to hold the outside edge of the picture frame to absorb some of the movement from the point insertion. It is advisable not to angle the Dual Drive Point Driver 'Downwards' as this may cause "Pinching" of the materials within the picture frame and result in a 'Wrinkled' appearance.

Adjust tension when driving into various types of wood, for example, you may want to increase the tension if you are driving into a hardwood frame etc.

Logan Graphic Products offers both the Flexible and Rigid Points in 600 count and 2500 count, available at most fine art stores.
